Project : Student Internship Management System

Group: B2

Name of Student	ID of Student	Score
SAM NANGALEX	e20220253	
PENG SEYHA	e20220620	
OUN RITHI	e20220420	
SOEUN SEREYVATH	e20220907	
YI MONIROM	e20220175	

Lecturer: Roeun Pacharoth

Academic year 2025-2026

Progress Report 4

Name: SAM NANGALEX

- Fix merge
- Fix some frontend

Name: OUN RHITI

1. Security

1.1 Company Routes Protection (Admin Only)

- ☒ ~~Create admin-only middleware~~
- ☒ ~~Test unauthorized access~~
- ☒ ~~Add error messages~~
- ☒ ~~Add admin-redirect~~
- ☐ Still need route to the access denied page

3. Secondary Module – Evaluation CRUD

Backend Logic

- ☒ ~~Create Evaluation model~~
- ☒ ~~Create Evaluation controller/service~~

Endpoints:

- ☒ ~~Add evaluation~~
- ☒ ~~Edit evaluation~~
- ☒ ~~Delete evaluation~~
- ☒ ~~Get evaluations by application~~
- ☒ ~~Restrict access: only supervisor can submit~~
- ☒ ~~Add score validation (0–100, maybe?)~~

Name: PENG SEYHA

- ☒ ~~Fix StudentController~~
- ☒ ~~Student dashboard page~~

Name: YI MONIROM

3. Secondary Module

3.1 Accept/Reject Internship

- ☒ ~~Create route for accept internship~~
- ☒ ~~Create route for reject internship~~
- ☒ ~~Add request validation~~
- ☒ ~~Update internship status~~

1. Security

1.1 Add Access Rules

- ☒ ~~Create middleware to check if user role = supervisor~~
- ☒ ~~Apply supervisor middleware to dashboard route~~
- ☒ ~~Apply supervisor middleware to accept/reject request route~~
- ☒ ~~Test unauthorized access (student, company, admin)~~

4. Frontend

4.1 Supervisor Dashboard

- ☐ Page layout (cards, stats)

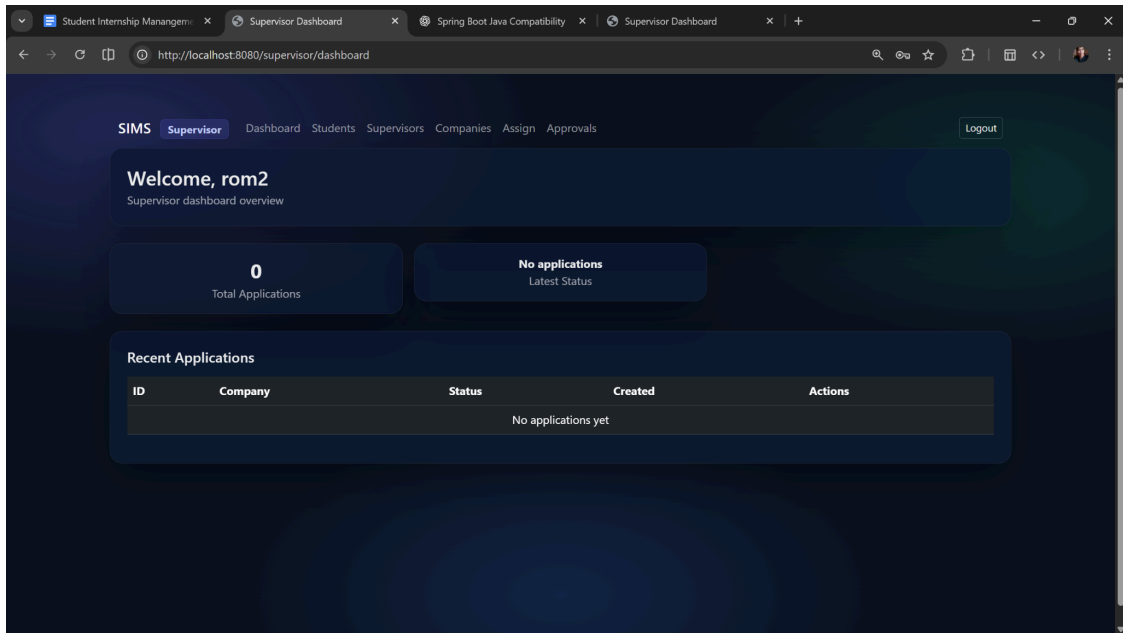

```

1  @Controller
2  @RequestMapping("/supervisor")
3  public class SupervisorController {
4
5      @Autowired
6      private SupervisorRepository supervisorRepository;
7      @Autowired
8      private UserRepository userRepo;
9      @Autowired
10     private ApplicationService applicationService;
11     @Autowired
12     private CompanyRepository companyRepository;
13
14     // Supervisor dashboard page
15     @GetMapping("/dashboard")
16     public String supervisorDashboard(Model model) {
17
18         Authentication auth = SecurityContextHolder.getContext().getAuthentication();
19         String email = auth != null ? auth.getName() : null;
20
21         if (email == null) {
22             return "redirect:/login";
23         }
24
25         User user = userRepo.findByEmailWithRoles(email)
26             .orElseThrow(() -> new RuntimeException("User not found"));
27
28         Supervisor supervisor = supervisorRepository.findById(user.getId())
29             .orElseThrow(() -> new RuntimeException("Supervisor record not found"));
30
31         model.addAttribute("supervisor", supervisor);
32
33         // Supervisor-related applications
34         List<project.demo.entity.Application> apps =
35             applicationService.getApplicationsBySupervisor(supervisor.getId());
36
37         apps = apps.stream()
38             .sorted(Comparator.comparing(
39                 project.demo.entity.Application::getCreatedAt,
40                 Comparator.nullsLast(Comparator.reverseOrder())
41             ))
42             .collect(Collectors.toList());
43
44         model.addAttribute("applicationCount", apps.size());
45
46         String currentStatus = apps.isEmpty()
47             ? "No applications"
48             : apps.get(0).getStatus().name();
49         model.addAttribute("latestStatus", currentStatus);
50
51         Map<Integer, String> companyMap = apps.stream()
52             .map(project.demo.entity.Application::getCompanyId)
53             .distinct()
54             .collect(Collectors.toMap(
55                 id -> id,
56                 id -> companyRepository.findById(id)
57                     .map(Company::getName)
58                     .orElse("Unknown"),
59                 (a, b) -> a
60             ));
61
62         model.addAttribute("companyMap", companyMap);
63         model.addAttribute("recentApplications", apps.stream().limit(5).toList());
64
65         // Note: Thymeleaf template should be located at:
66         // src/main/resources/templates/supervisor/supervisor-dashboard.html
67         return "Supervisor/dashboard";
68     }
69
70
71     @PostMapping("/applications/{id}/accept")
72     public String acceptApplication(@PathVariable Integer id) {
73         applicationService.updateStatus(id, ApplicationStatus.APPROVED);
74         return "redirect:/supervisor/dashboard";
75     }
76
77     @PostMapping("/applications/{id}/reject")
78     public String rejectApplication(@PathVariable Integer id) {
79         applicationService.updateStatus(id, ApplicationStatus.REJECTED);
80         return "redirect:/supervisor/dashboard";
81     }
82 }
